8.1.2 Additional exposure limits under the conditions of use: Not available.

8.1.3 DNEL/DMEL and PNEC-Values: Not available.

8.2 Exposure controls

8.2.1 Appropriate engineering controls:

Should be sufficient to reduce exposures below the workplace standards for acetone established by the national regulations to the lowest level achievable.

8.2.2 Individual protection measures, such as personal protective equipment:

Eye/face protection: Chemical type goggles, safety glasses with splash shields, or suitable face shields should be used.

Hand protection: Repeated exposure may cause skin irritation and/or sensitization. Wear impermeable gloves. e.g. PVC, Nitril. Handle in accordance with sensible hygiene and safety practice.

Body protection: Suitable protective clothing and eye protection should be in accordance with national, or regional standards and regulations.

Respiratory protection: Ventilation and respiratory protection must be used. In addition to engineering controls and safe work practices, personal protective equipment may be needed. Personal respiratory protection equipment appropriate for this material can range from (1) a reusable cartridge half face mask with organic solvent cartridge filter and particulate filter (P100); to (2) a supplied air system depending on the scope of work. A respiratory protection program that meets OSHA 1910.134 and ANSI Z88.2 or applicable federal/provincial requirements must be followed whenever workplace conditions warrant respirator use. NIOSH's "Respirator Decision Logic" may be useful in determining the suitability of various types of respirators. Persons should not be assigned to tasks requiring the use of respirators unless it has been determined they are physically able to perform the work and are trained to use the equipment.

8.2.3 Environmental exposure controls:

Avoid discharge into the environment.
